Practical 04 : To implement a Python program to display file available in the current directory.

By Parth Gawad, Roll no 62

```python
from pathlib import Path;

curr_directory = Path('.');
files = [f for f in curr_directory.iterdir() if f.is_file()];
print("Files in the current directory : ");
for file in files :
    print(file);
```

```
Files in the current directory :
parth.txt
Prac3Exp3.ipynb
Prac4Exp4.ipynb
```
